HYPERRACK'S 3 DECADES JOURNEY

1996

Central Rack Enterprise was founded by Mr Jimmy Chai.
Location: Jalan Tepi Sungai.

2018

Hyperack Sdn Bhd moved to Lintang Gelugor Klang and continues to grow.

2021

We start manufacturing our own products.

2006

Central Rack Sdn Bhd. moved to a new building.

2014

Mr Chester Chai founded Hyperack Sdn Bhd.
Location: Bandar Baru Klang

2017

Merger between Hyperack Sdn. Bhd. & Central Rack Sdn. Bhd.

2022

Purchased a 3.75 acre industry land for our future production plant planning

2023

"Malaysia Top 10 E-commerce" award from the Selangor government

MEET THE HYPERIAN TEAM

Meet the Hyperian Family! We always call ourself HYPERIAN.

Here at Hyperack, we're not just a company-we're a team. We're a group of all-around awesome people from all over the world, each bringing unique backgrounds and perspectives to the table. We're a growing family, always looking for new ways to create superb experiences for our clients.

Despite our growth, we still take care of each other. We rely on each other's expertise to create a super creative and supportive environment. By working closely together, we ensure every project is completed smoothly and delivered on time across multiple departments.

We are trained to care deeply about our client's success, building strong relationships founded on trust and transparency. When you choose Hyperack, you choose a team that truly understands your needs and is dedicated to delivering exceptional results.

So, if you're looking for a team that's passionate, collaborative, and can solve any issue, you've come to the right place!

**HEADQUATER @ KLANG**

ABOUT US

 **Established since 1996**

HYPERRACK SDN. BHD. (commonly shortened to **HYPERRACK**) is a premier provider of advanced Pallet Racking Systems and Warehouse Storage Equipment. With a deep commitment to excellence, HYPERRACK has established itself as one of the leaders in the industry, offering a comprehensive range of storage solutions tailored to meet the diverse needs of businesses.

Our team comprises passionate experts and technical specialists with over 20+ years of combined experience in warehouse storage solutions. This extensive experience enables us to deliver innovative, efficient, and reliable storage systems that enhance operational efficiency and maximize space utilization for our clients.

As one of Asia's fastest-growing storage system companies, HYPERRACK has earned an impeccable reputation for the quality of our products and the superior craftsmanship that goes into every solution we provide. Our technical know-how, coupled with our problem-solving capabilities, ensures that we can address even the most complex storage challenges.

We pride ourselves on building strong partnership relations with our clients, working closely to understand their unique requirements, and delivering customized solutions that drive success. Our commitment to excellence and customer satisfaction has positioned HYPERRACK as a trusted partner in the warehouse storage industry.

FACTORY @ PENANG

At Hyperack, our priority is to provide top-quality storage solutions that meet the diverse needs of our customers. Leveraging our extensive industry experience, we offer a range of innovative and reliable products designed to enhance efficiency and organization in various settings. Our commitment to excellence ensures that every product we deliver is of the highest standard, combining durability with exceptional functionality.

One of our key strengths is our partnership with reputable manufacturers, such as **Eonmetall Group Berhad**, who help us maintain our high standards of quality. This collaboration allows us to bring you products that are not only robust and durable but also cost-effective. Our strict quality control measures ensure that each storage system meets rigorous standards before reaching our customers.

At Hyperack, we believe in building long-term relationships with our clients by offering lifetime support for all our products. Our dedicated team of experts is always ready to assist you, ensuring your storage systems remain in optimal condition throughout their lifespan. This ongoing support is a testament to our commitment to customer satisfaction and trust.

In addition to our superior products and support services, we offer comprehensive product liability insurance coverage of up to 5 million ringgits. This significant coverage provides peace of mind, knowing that your investment is protected against unforeseen circumstances. It reflects our confidence in the quality and reliability of our storage solutions.

Choosing Hyperack means choosing a brand synonymous with durability, reliability, and exceptional customer service. Our products are engineered to withstand the demands of daily use, delivering long-lasting performance and value. We take pride in exceeding customer expectations and continuously strive to innovate and improve our offerings.

In summary, Hyperack is your trusted partner for high-quality storage solutions. Our industry experience, commitment to quality, lifetime support, and robust insurance coverage make us the ideal choice for businesses looking to optimize their storage capabilities. Choose Hyperack for storage solutions you can rely on.

*“Customer feedback:
See what they say about Hyperack?”*

“I've been using HYPERACK and I'm impressed. They provided clear and helpful information on storage and racking issues. Their racking system is a great option for anyone looking for a storage solution and equipment.”

“Hyperack transformed our warehouse! Their pallet racking systems not only maximized our storage space but also streamlined our operations. Their team's expertise in installation and space management was exceptional. Highly recommend for any business looking to optimize storage solutions.”

“As a logistics manager, I've dealt with various racking companies, but Hyperack stands out. Their durable racking systems withstand heavy use and have boosted our efficiency. Plus, their customer service is top-notch—always responsive and helpful.”

“Hyperack's racking solutions are a perfect blend of quality, efficiency, and cost-effectiveness. Their team helped us design a layout that maximized our space, and their after-sales support has been outstanding. A trustworthy partner for growing businesses.”

“Hyperack is really prompt, immediate action whenever we try to give a call to all the suppliers. Hyperack is the first one who really contact us to come up with the proposal, the quotation, everything straight to our requirements.”

"WE ARE COMMITTED TO SERVING THESE VALUED CLIENTS WITH WAREHOUSE RACKING SOLUTIONS."

"WE ARE COMMITTED TO SERVING THESE VALUED CLIENTS WITH WAREHOUSE RACKING SOLUTIONS."

ACHIEVEMENT Superbrands Award Status

Hyperack Sdn Bhd: The Trusted and Recognized Brand in the Rack Industry

Over the years, **Hyperack** has received numerous prestigious awards, including the **SUPERBRAND** award, highlighting our exceptional achievements and unwavering commitment to customer satisfaction. These accolades reflect our continuous efforts to improve our products and services. We pride ourselves on understanding and meeting the unique needs of each client, ensuring they receive tailored solutions.

Hyperack Sdn Bhd is a trusted and recognized leader in the rack industry. Known for our excellence, we have earned praise from customers and experts in Malaysia and beyond for our outstanding performance and commitment to quality. Our dedication to innovation and superior craftsmanship distinguishes us as industry leaders.

As the leading company in Malaysia's rack industry, Hyperack Sdn Bhd consistently delivers top-quality products and services. Our extensive range of high-quality racks and storage solutions is designed to enhance efficiency and organization for businesses of all sizes. We believe in building strong, lasting relationships with our clients, based on trust, transparency, and mutual respect.

**Top 3 of Selangor
E-Commerce Merchant Awards 2022**

**Top 10 of Malaysia
E-Commerce Merchant Awards 2023**

We are honored to be recognized by the Selangor government for our excellence in e-commerce. In 2022, we proudly secured the **Top 3 position** in the **Selangor E-Commerce Merchant Awards**. Building on this success, we achieved a **Top 10** ranking in the **Malaysia E-Commerce Merchant Awards in 2023**. These prestigious accolades reflect our commitment to quality, innovation, and customer satisfaction. We are dedicated to continuing our mission of delivering exceptional storage solutions and advancing the e-commerce industry in Malaysia and beyond.

Rack Safety Awareness Course 2024

At Hyperack, we are committed to ensuring the highest safety standards in our products and services. Our co-founder recently completed the **Racking Safety Awareness Course**, certified by **SEE Storage Equipment Experts, UK**. This course reinforces our dedication to delivering storage solutions that not only meet our customers' needs but also adhere to international safety regulations. With this certification, we continue to prioritize safety, quality, and reliability in every project, ensuring that our racking systems are compliant with the latest safety guidelines.

Hyperack recognised by Superbrands Malaysia

KUALA LUMPUR: Hyperack Sdn Bhd anticipates this year's revenue to increase from last year, driven by higher sales of its racking system products via e-commerce platforms and commercial partners.

Founder and managing director Chester Chai Boon Hien said the pallet racking storage system provider had recorded stable revenue as of mid-October and expected the momentum to continue for the remaining two months of the year.

"We anticipate strong sales and most of the revenue is likely derived from e-commerce platforms like Lazada and Decathlon," he told the New Sunday Times in a virtual interview recently.

Chai said Hyperack expected to double its annual revenue on the back of burgeoning demand for hardware racking systems, mainly among warehouse operators from e-commerce and end-users recently.

Parts congestion and supply chain disruptions, and higher freight rates would also fuel demand for warehouse storage.

He said this would support the uptake in demand for Hyperack products for the commercial segment (warehouses).

"The booming e-commerce industry and the One Belt One Road (OBOR) initiative by the Chinese government would fuel growth for warehouse storage and racking systems."

However, it is not only major business enterprises that build more warehouses due to higher storage demand resulting from the supply chain disruptions, he said.

With the installation of Hyperack's

racking systems, Chai said business owners could optimise their storage capacities by up to 70 per cent.

"We have 18 types of warehouse racking systems under Hyperack: Selective Pallet Racking System, Double-Deep Pallet Racking System, Shuttle Pallet Racking System, ASRS Racking System, E-commerce Racking Supported Platform, Cantilever Racking System and more."

"We help customers design a racking system according to their business requirements. This helps to cut costs and reduce inventory, space and time while optimising their warehouses' space. In addition, we can reduce labour costs and warehouse management cost," he said.

"We also have a Warehouse Management System (WMS) with Automation Warehouse Racking System. It does not require manual lifting equipment but rather use machine — auto storage and auto retrieval system," he said.

To date, Hyperack has executed over 1,000 racking system projects since 2018.

"Many customers were aking for E-commerce Racking Supported Platform since 2018, thanks to the boom in e-commerce. As a result, most customers have this system installed at their warehouses and showrooms," he said.

Recently, Hyperack has sold over 70,000 units of its Value-Rack series to end consumers through online sales since it was launched in April last year.

"Additionally, there were more than 50,000 products sold through offline sales in 2020," Chai said.

On the growth of Hyperack, he stressed up production earlier this year to supply racking systems with diverse applications for home-based users and business owners, warehouse operators.

On the commercial shelving market, Chai said 70 per cent of its customers were business owners and hardware shop operators.

However, the market environment and consumer preference have evolved as Hyperack achieved most of its sales through online channels (80 per cent) and 20 per cent of business owners during the lockdown.

"But now, things have gone back to normal with 40 per cent of our sales derived from online and 40 per cent from business owners, commercial segment," said Chai.

Hyperack recently bagged the Superbrands Awards 2021 for being the top-selling product for heavy-duty racks and storage racks for the online retail marketplace.

"The recognition validates our high-quality products with timely delivery that satisfied our customers."

"We also established long-term business relationships with customers, for repeat orders on a project basis. This contributes to the success of the company's brand," Chai said.

For those interested, he received a voucher code for RM5 cashback on Shopee (shopee.com.my/hyperack) using the code HYPENGB9. For more information, visit www.hyperack.com.my.

Harian Metro

FEATURED IN TV8

In 2022, our founder & managing director - Chester Chai- was honored to be interviewed by TV8 to share about Hyperack branding. This exclusive interview provided a platform for Hyperack to showcase its industry leadership, innovative solutions, and remarkable achievements to a wide audience. It further solidified Hyperack's reputation as a market leader in the Racking Industry, enhancing its brand visibility and credibility.

THE OWNER | Meet Chester Chai

"Hey there, I'm Chester, and I've got a serious passion for all things racking. I kickstarted HYPERACK with one big dream: to shake up the storage scene in Malaysia. It's been a wild ride of nearly three decades, constantly tinkering and innovating to make racking smarter, cheaper, and easier to get your hands on.

And you know what sparked the idea? Selling Racks online, thanks to a little thing called Google and the magic of E-commerce, we became the first company to do so. Our Racks? They're not just racks, they're game-changers. We crafted with top-tier materials, they're a breeze to set up and built to last. Our Racking System? It's not just a system, it's a solution. We provide all services to keep your satisfaction level high.

Here at HYPERACK, our customers are the heartbeat of everything we do. We're talking over a million happy faces giving us an awesome 4.9-star rating. But, don't just take my word for it. Go to our website or our sales team. And if you've got questions, well, consider us your racking gurus, always ready to lend a hand!"

Mr. Chester Chai,
Co-Founder of HYPERACK

COMPANY CULTURE

MISSION

- Empowering All Hyperian For A Better Life
- Making Quality Racking System Affordable For Every Customer
- Transforming Warehouses From Profit Killer To Profit Generator

VISION

To become the No.1 Trusted & Well-known Racking Brand in Malaysia

“Proud to be a Hyperian”

THE MEANING BEHIND OUR LOGO

Why elephant?

Symbolizing the solidity and sturdiness of our products.

Just like an elephant, our storage solutions are built to be strong and reliable, ensuring durability and dependability for all your storage needs. Trust Hyperack for robust and lasting performance.

CORE VALUE

Customers First

(Blue) - Patiently Putting Our Customers First in All That We Do:
Customer-Centric Approach, Not Management-Centric.

Do Your Best

(Red) - Passion. Strive for excellence in all that you do and always aim to deliver your best performance.
Don't settle for mediocrity, and make yourself and your loved ones proud.

Think Differently

(Yellow) - Creative. We believe in the power of creative thinking. There are no boxes or limitations to hold us back, only possibilities waiting to be explored. We challenge ourselves to always think outside of the box and always seek new and better ways.

Be Thankful

Blue, Red, Yellow

These three colors represent our country Malaysia, reminding us of our roots. One day, we must lead the local brand of Malaysia to the world and bring pride to the country. We must be proud to tell everyone that we come from Malaysia.

Be Humble

We put the 3 colors on the ears. Listen to others, don't be self-centered. A humble heart brings happiness and earns respect. Live like rice, the richer you become, the more you have learn to bend down and bow your head.

Innovation

Keep Improving. The triangle is the most stable structure. This triangle represents the symbol of our team's innovation. This structure supports the entire HYPERACK. Keep improving, but don't make useless improvements, all improvements that do not contribute to helping customers will be considered as useless.

CODE & ETHICS

Confidentiality:

We highly value the privacy of our clients and company information.

We commit to keeping all sensitive data confidential and will not disclose or misuse any information, whether it pertains to clients, business plans, or internal data.

Acceptance of Gifts:

We believe in the importance of fair competition, which is why our employees will not accept any gifts, kickbacks, or benefits that may influence impartial decisions. Our focus remains on providing the best products and services to our clients.

Honesty and Integrity:

Honesty is the foundation of our corporate culture. We encourage open and sincere communication among employees and with colleagues, clients, and partners. We believe that honest and straightforward interactions foster strong relationships.

HOW WE PRODUCE OUR OWN PRODUCT

Curious about how we make our **unique storage** and **display racks**?

Let's peek behind the curtain!

1

Pick a Steel Strip:
We choose the perfect size and shape steel ring for the desired rack.

2

Shape & Cut:
A machine precisely bends and trims the ring using hydraulics and blades.

3

Finishing Touches:
Powder coating or paint adds style and protects the metal.

4

Quality Check:
We weight and inspect each rack with our E1 HDF board to ensure top-notch quality.

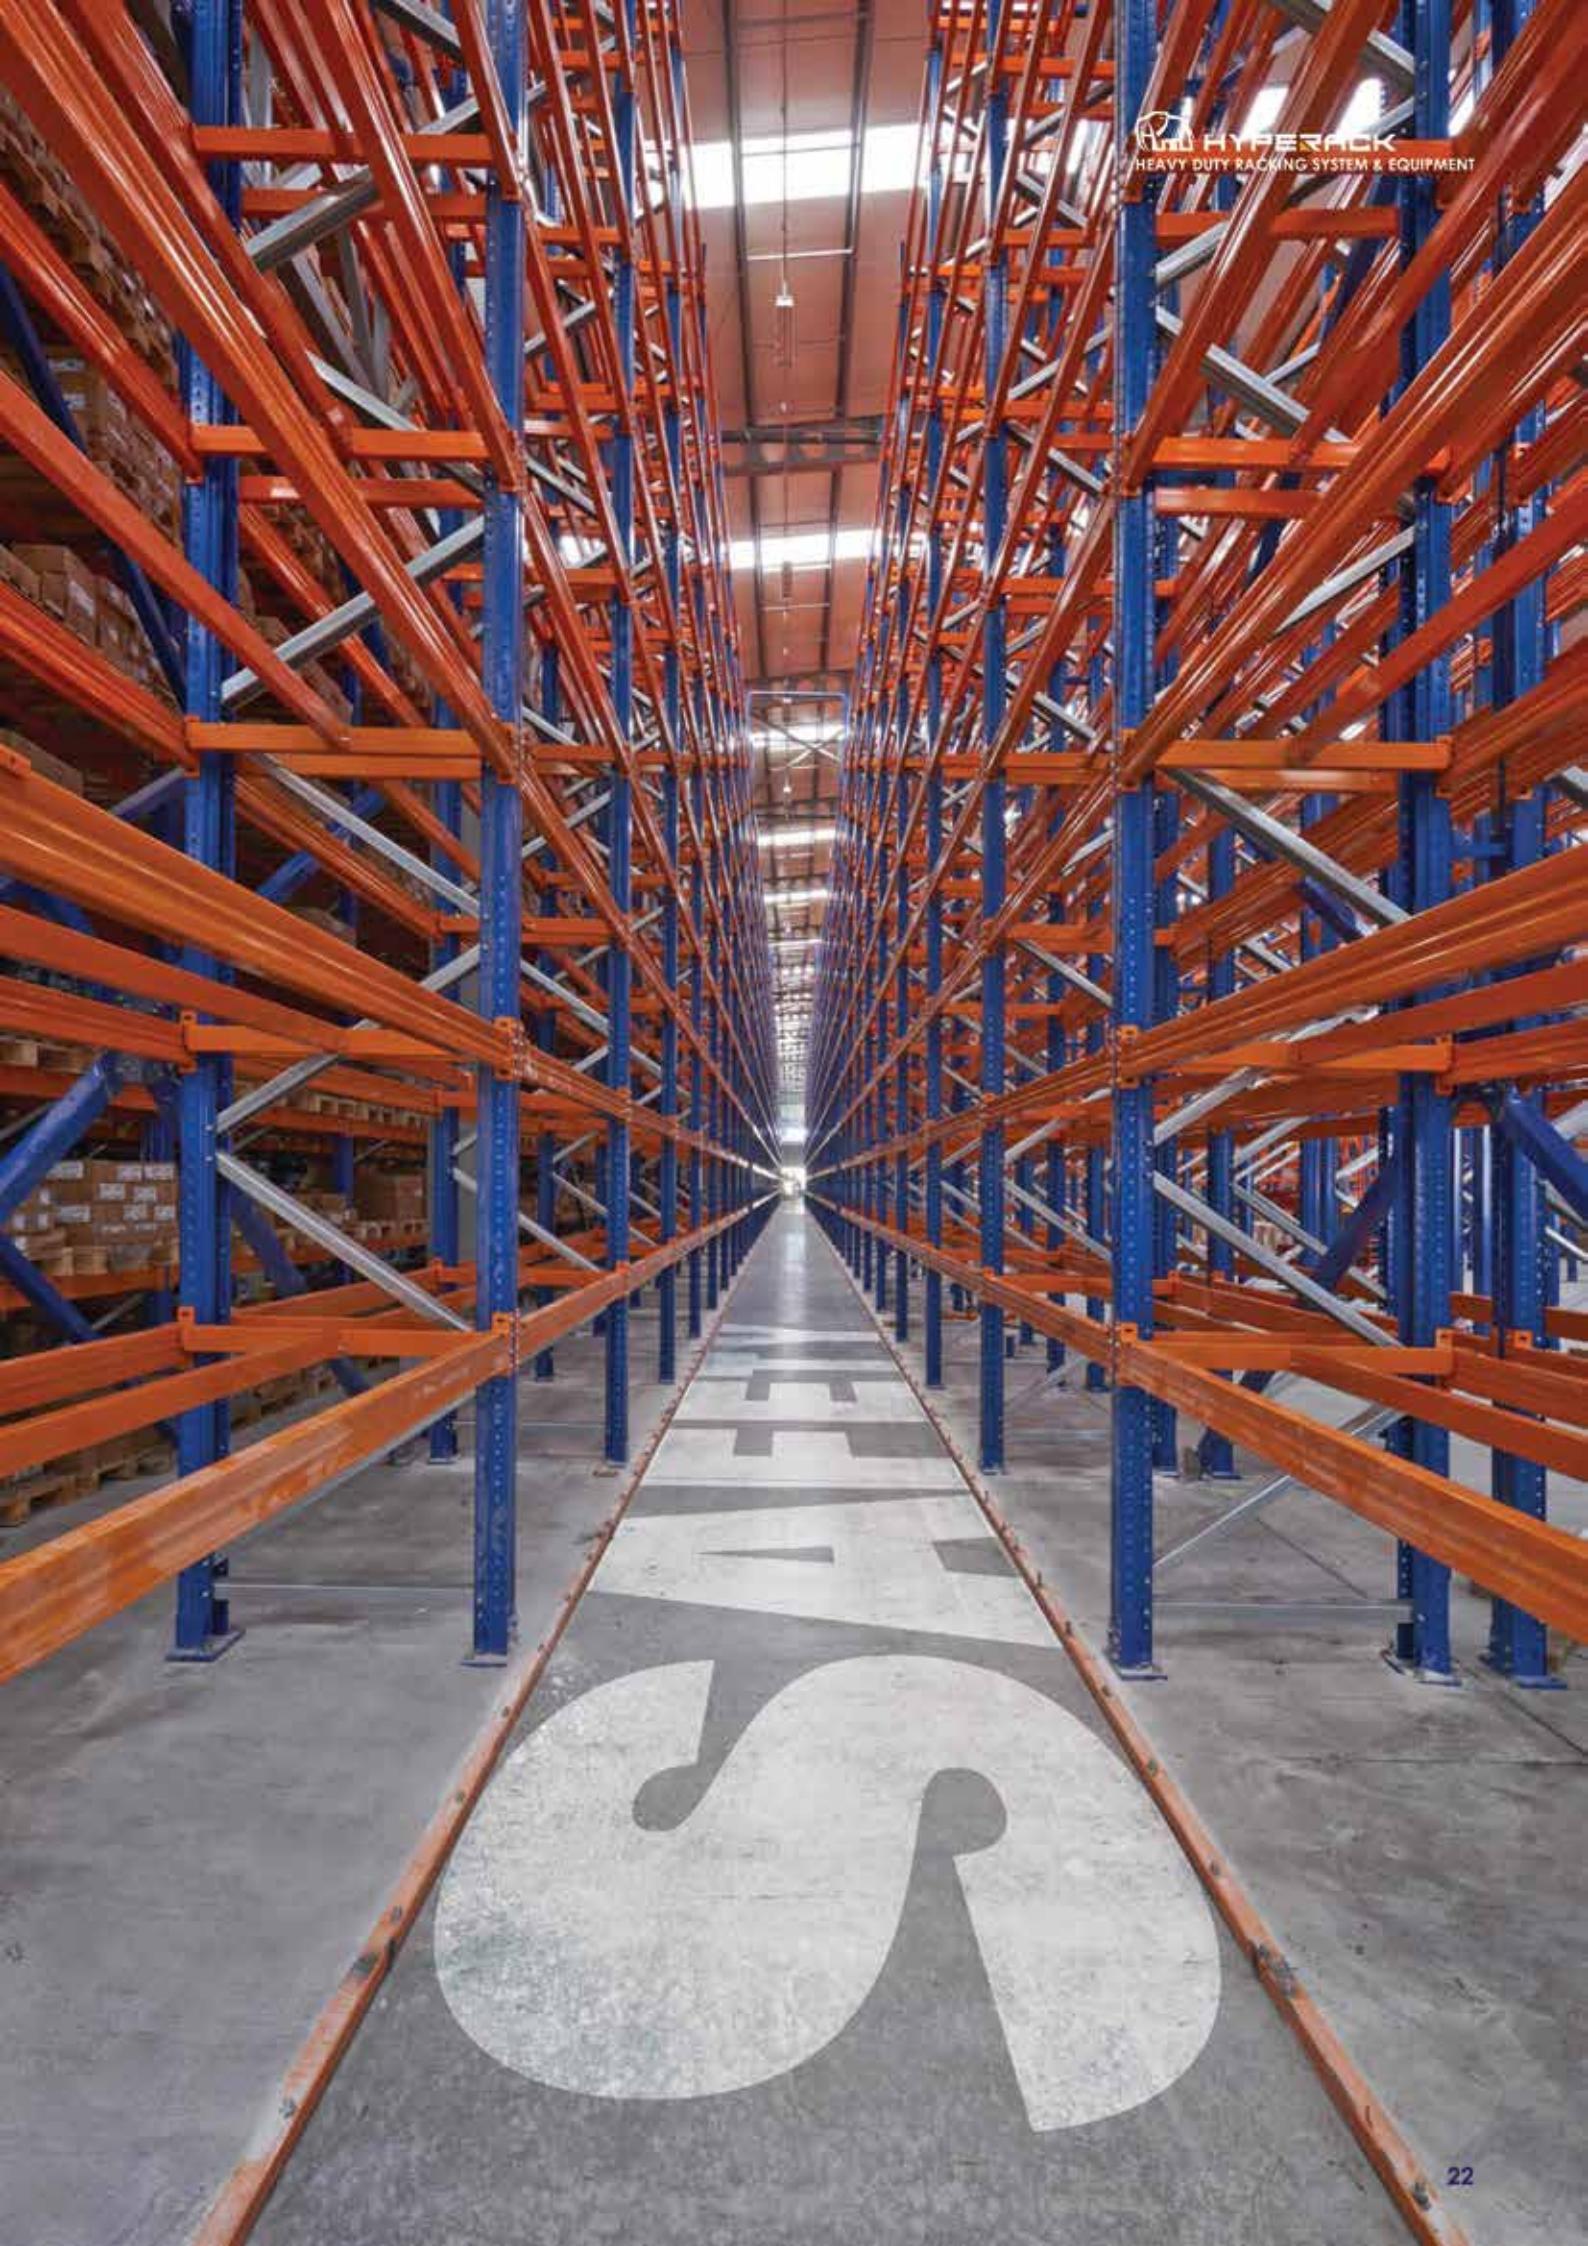

5

Ready to use!

HEAVY DUTY — RACKING SYSTEM & EQUIPMENT

RACKING INSPECTION

Our Racking Inspection service ensures the safety and reliability of your storage systems. We conduct thorough assessments of your racking structures, identifying any signs of wear, damage, or misalignment. Our experienced inspectors follow industry standards and guidelines to provide detailed reports and recommendations for maintenance or repairs. Regular inspections help prevent accidents, improve operational efficiency, and extend the lifespan of your racking systems. With our professional Racking Inspection service, you can maintain a safe and organized warehouse environment, ensuring compliance with safety regulations and minimizing the risk of costly disruptions. Trust us to keep your storage systems in top condition.

RACKING SYSTEMS INSPECTION

THE REPORT YOU WILL RECEIVE USES THE TRAFFIC LIGHT SYSTEM:

Red: Severe Damage That Requires The Rack To Be Off-loaded Immediately And Isolated From Use.

Amber: Damage That Needs Repairs But Does Not Require Immediate Off-loading.

Green: Items With Negligible Damage That Is Safe To Use.

INSPECTIONS CAN:

- Prevent Damage To People Or Goods.
- Extend The Life Span Of Facilities.
- Minimise Future Repair Costs By Discovering Risks Early.
- Offer A Speedy Repair Service.

ANNUAL RACK INSPECTION SERVICE:

- Comprehensive Professional Inspection.
- No Interruption To Operations.
- Detailed Inspection Report.
- Independent Expert To Assess Equipment.
- Reminder Of When Next Inspection Is Due.
- Support Between Visits.
- Load Signs For Each Rack Stating Its Maximum Capacity.

ENSURING SAFETY ALWAYS

UPRIGHT HYPER SHIELD

COLOUR/DETECTION:

Comes as a standard hi-visibility yellow, it creates a focal point for drivers of mechanical handling equipment and gives them a definitive indicator of their safe working.

IMPACT DIFFUSING FOAM INTERIOR:

The specialist foam diffuses impact energy and diverts the kinetic energy away from the racking upright, saving you money and time on a replacement leg.

EASE OF INSTALLATION:

The guard can easily be installed by hand on any racking type, this to be fitted in seconds without the use of power tools and drilling needless holes into your warehouse floor.

TOUGH OUTER SHELL:

Outer shell is made from an exceptionally resilient and hard-wearing plastic designed to take high velocity impacts.

EXTENDED SIZE:

Rack Armour comes as standard at 600mm high, this area was proven in extensive testing to receive the brunt of all impacts from mechanical handling equipment.

ZERO FLOOR DAMAGE:

Often metal systems are drilled to the concrete which in turn takes the brunt of every impact the guard takes; the impact energy disperses to the floor and the fixings. This often leaves the floor crumbling and weak.

Warehouse management requires balancing storage, safety, and efficiency. That's why we created a simple rating system for common racking systems. The system evaluates several key performance indicators (KPIs) for each racking system.

Our rating system gives you valuable insights, but you also need a holistic approach. Consider these additional factors such as durability, Ease of assembly & maintenance, and Inventory management. By comparing the strengths and weaknesses of different racking systems, you can make informed decisions for your warehouse.

Remember, there is no one-size-fits-all solution. You need to find the best fit for your specific needs and goals. Talk to our team for more information and the latest update.

SELECTIVE PALLET RACKING

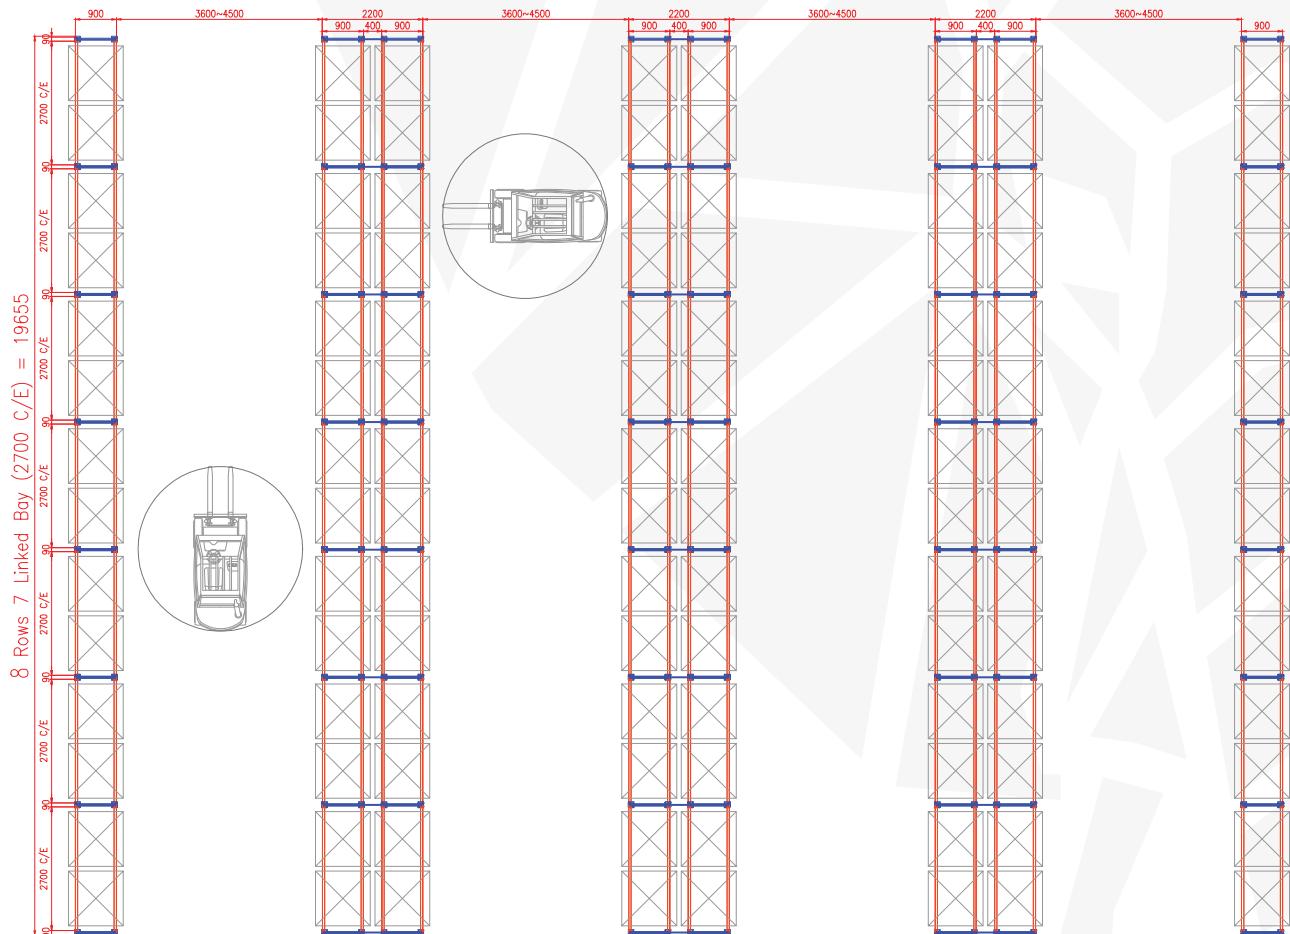

Our **Selective Pallet Racking System** is designed for maximum accessibility and flexibility, ideal for warehouses storing a wide variety of products. This system allows direct access to each pallet, facilitating efficient inventory management and retrieval. It supports a diverse range of pallet sizes and weights, making it versatile for different storage needs. The system is easy to install, adjust, and expand, providing a scalable solution as your storage requirements grow. With its open design, selective racking optimizes visibility and accessibility, ensuring quick and easy product handling, enhancing warehouse efficiency, and minimizing downtime.

ADVANTAGES:

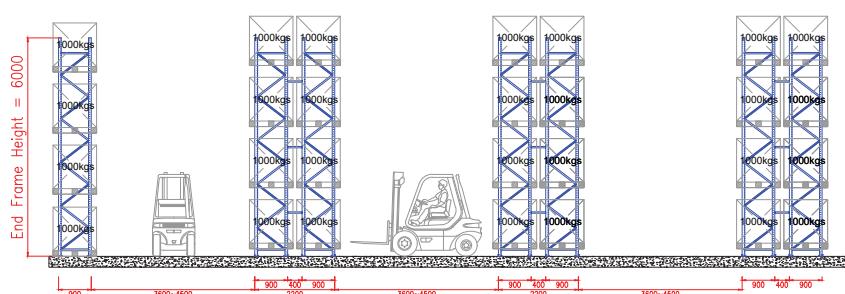

- Lowering Structure Costs.
- Low Floor Area Utilization.
- Good Stock Rotation.
- Good Order Picking; 100% Selectivity.
- Rapid Handling Of All Types Of Palletized Goods.
- Can Be Used In Conjunction With All Types Of Lift Trucks.

SUITABLE FOR CUSTOMERS:

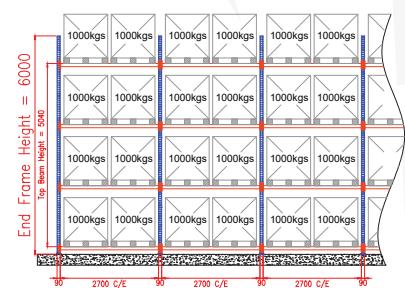

- Fast Moving Consumer Goods (FMCG).
- Inventory Is Rapidly Depleted And Restocked (Called Quick Turnover).
- Different Categories Of Goods.

DOUBLE-DEEP RACKING SYSTEM

The **Double-Deep Racking System** effectively doubles your storage capacity by allowing pallets to be stored two deep. This high-density storage solution is perfect for maximizing warehouse space while maintaining selectivity. Ideal for storing large quantities of similar products, it enhances storage efficiency and reduces handling times. The system requires specialized forklifts with extended reach capabilities. Its robust construction ensures stability and safety, making it a reliable choice for high-volume warehouses looking to optimize their storage capabilities without compromising accessibility.

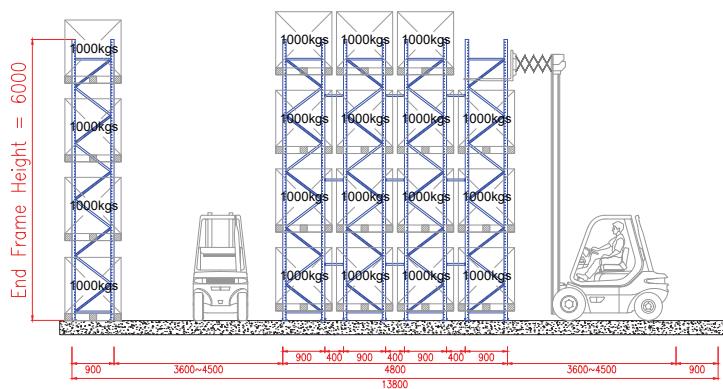

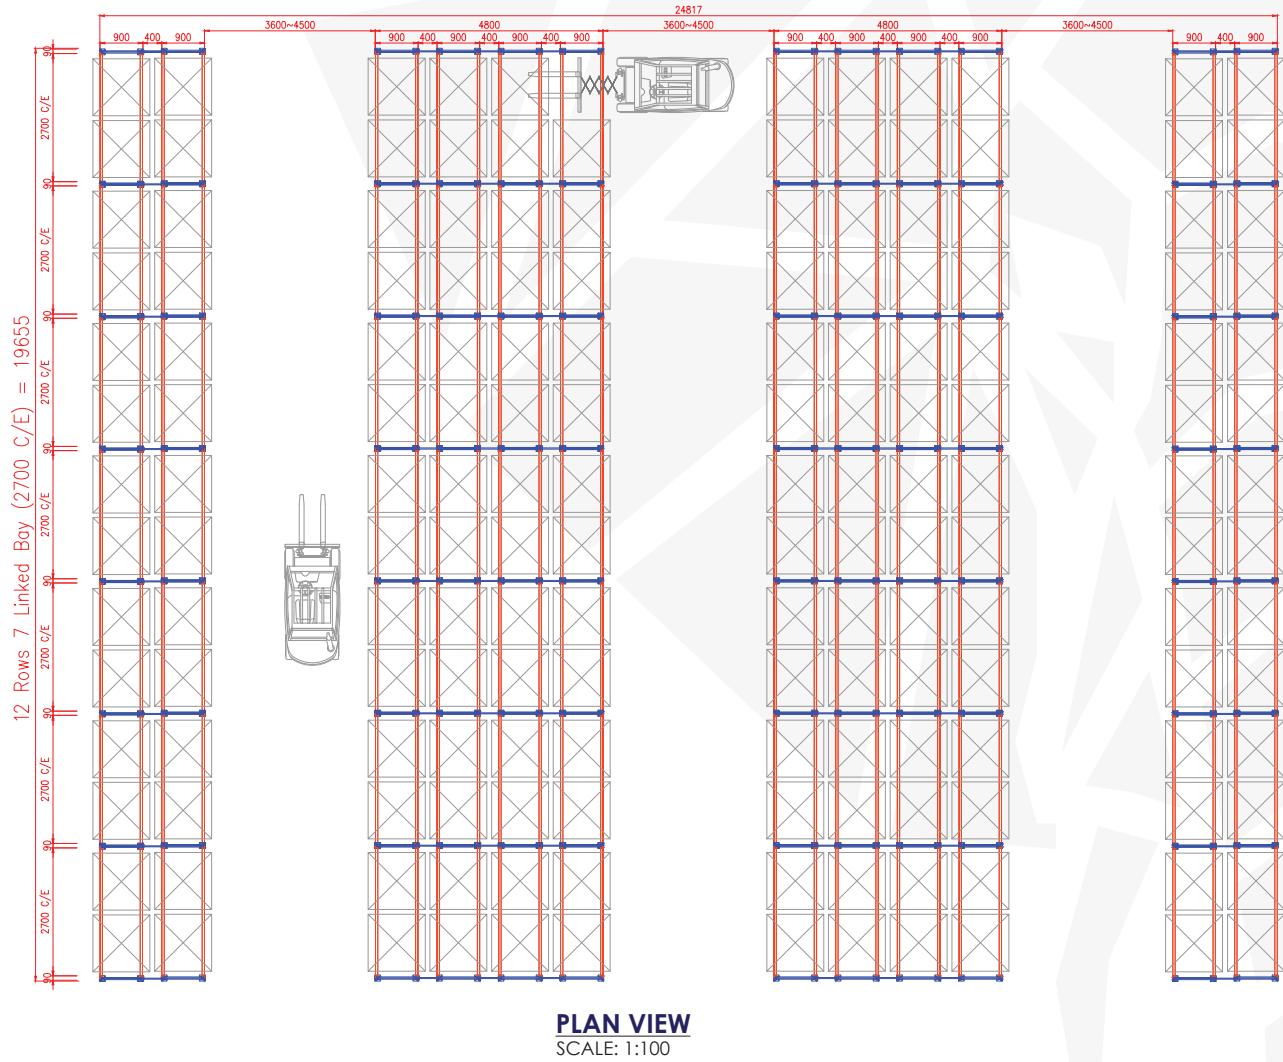

ADVANTAGES:

- Achieving Increases In Capacity Of Up To 30% More Than Selective Pallet Racking.
- Lower Cost Alternative Against Drive-in Racking, While Increasing Capacity By Up To 30%.
- Doesn't Require High Number Of Homogenous Pallet Types.

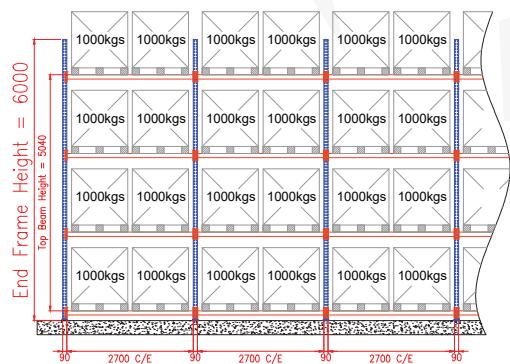

SUITABLE FOR CUSTOMER:

- When Alternative Systems Such As The Drive-in Racking Are Not Possible.
- High Density Storage- Maximizing Cubic Space.
- Reduces Aisles Space Increases Cubed Space Utilization.

SIDE VIEW
SCALE: 1:100

FRONT VIEW
SCALE: 1:100

VERY NARROW AISLE-VNA RACKING SYSTEM

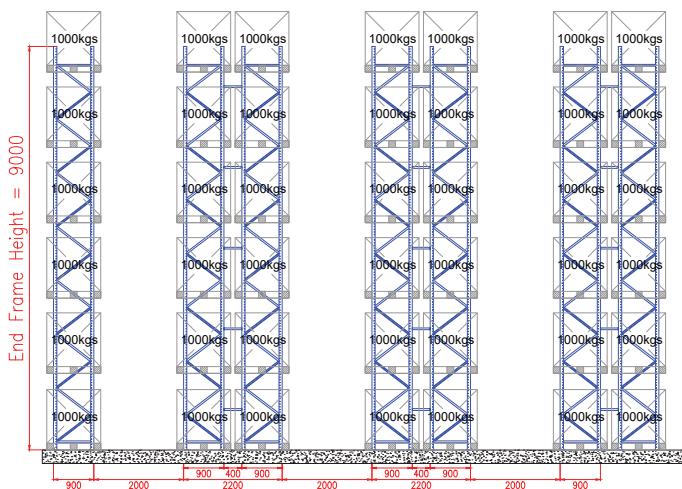

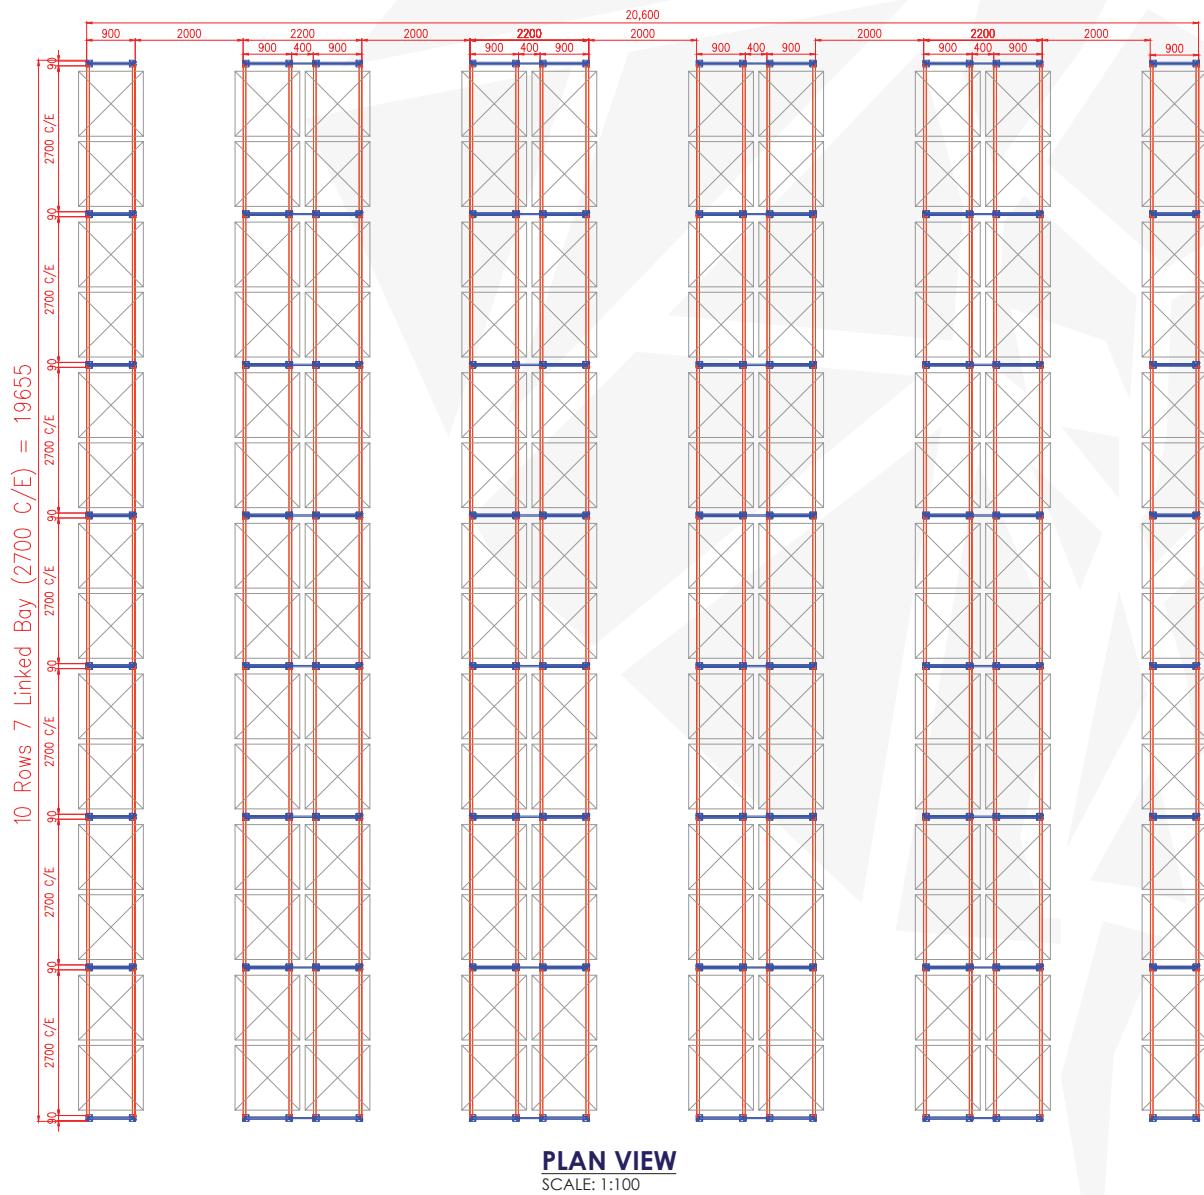

Our **Very Narrow Aisle (VNA) Racking System** is engineered to maximize space utilization by reducing aisle width. This system increases storage density and maximizes floor space, making it ideal for warehouses with high storage demands and limited space. Compatible with specialized VNA forklifts, it ensures efficient and safe operations in tight spaces. The VNA system is designed for high selectivity and easy access to each pallet, enhancing productivity and inventory management. Its sturdy construction provides stability and durability, ensuring long-term performance and reliability in demanding warehouse environments.

ADVANTAGES:

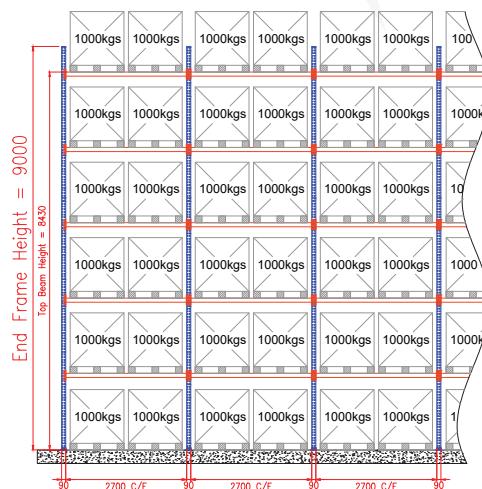

- Good Stock Rotation.
- Good Order Picking; 100% Selectivity.
- Rapid Handling Of All Types Of Palletized Goods Increase By An Additional 40% Over.
- Selective Pallet Racking System.
- Uses Guide Rails Or Wire Guidance For Fast Movement In Aisle.

SUITABLE FOR CUSTOMERS:

- Requires A Super Flat Floor.
- Having Up To 17meters High Space.
- Fast Moving Consumer Goods (FMCG).
- Inventory Is Rapidly Depleted And Restocked (Called Quick Turnover).
- Different Categories Of Goods.

SIDE VIEW
SCALE: 1:100

FRONT VIEW

DRIVE-IN RACKING SYSTEM

The **Drive-In Pallet Racking System** is a high-density storage solution designed to maximize warehouse space by allowing forklifts to drive directly into the rack structure. This system is ideal for storing large quantities of homogenous products with low turnover rates. By reducing aisle space and increasing storage density, it optimizes warehouse capacity. The system supports last-in, first-out (LIFO) inventory management and is suitable for bulk storage. Its robust design ensures stability and safety, making it a reliable and efficient choice for warehouses looking to maximize storage space and streamline operations.

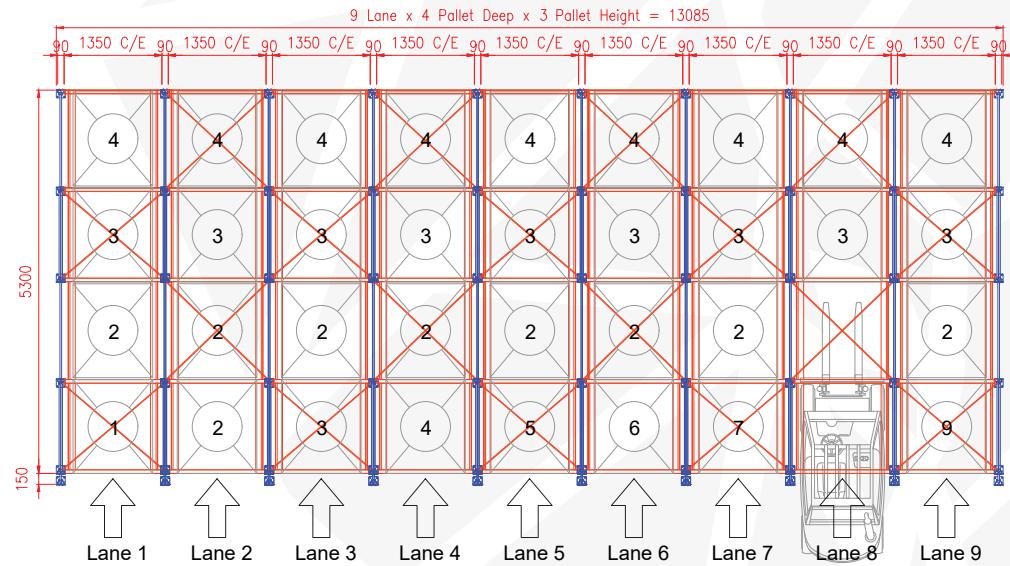

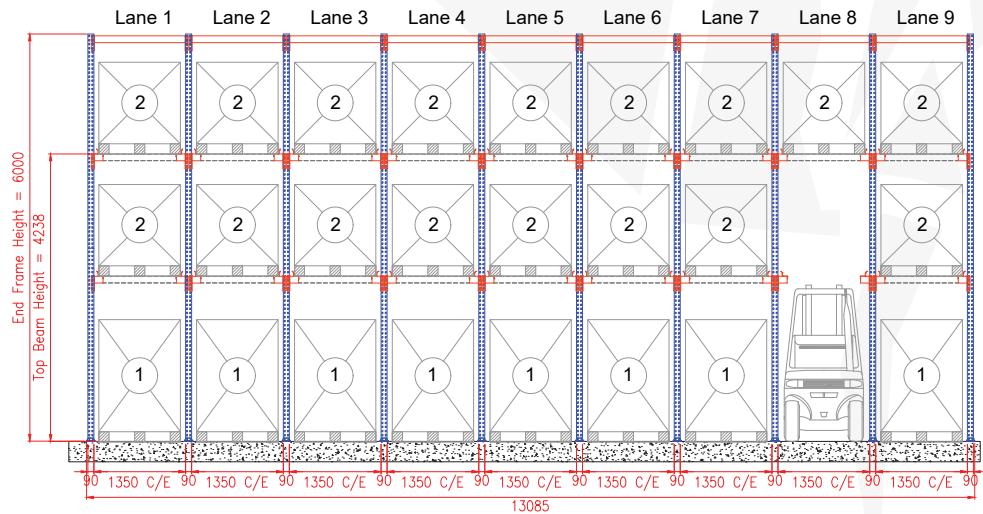

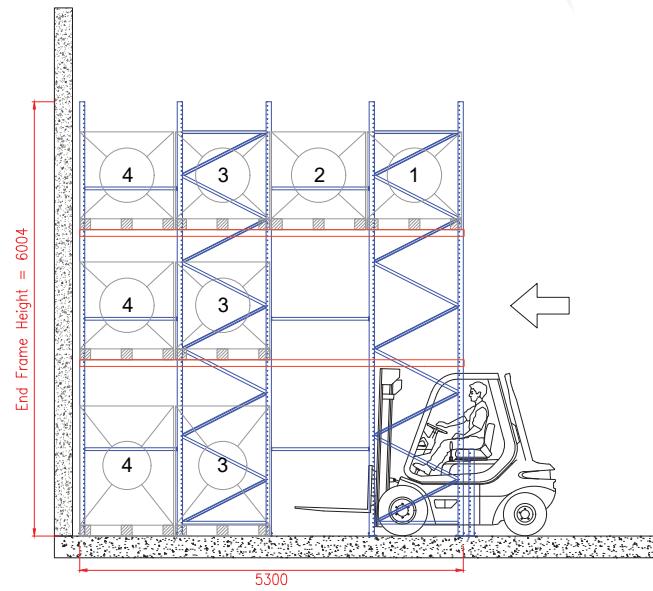

ADVANTAGES OF HYPERACK DRIVE-IN PALLET RACKING SYSTEM:

- High Density Storage- maximizing cubic space.
- Reduces Aisles Space Increases Cubed Space Utilization.
- More Pallets Stored Per Cubic Meters Than Any Other Storage Systems.

SUITABLE FOR CUSTOMER:

- Used For Bulk Goods Of The Same Type.
- Ideal For Cold And Chill Storage Applications.
- Particularly Suitable For Seasonal Goods.

PUSHBACK RACKING SYSTEM

Our **Push-Back Racking System** offers efficient, high-density storage by allowing pallets to be loaded from the front and pushed back on inclined rails. Each lane can hold multiple pallets, providing easy access to products and reducing aisle space. This system is ideal for warehouses needing quick and flexible stock rotation, supporting last-in, first-out (LIFO) inventory management. Its durable construction ensures stability and long-term performance, while the gravity-fed mechanism enhances picking efficiency and reduces handling times, making it a perfect solution for dynamic storage environments.

ADVANTAGES:

- High Density Storage - Maximizing Cubic Space
 - Not Aisles.
- Quick Easy Access To Different Size Of Pallet Types.
- Pallet Automatically Presented At The Rack Pick Face.
- Reduces Truck Travel Distances And Cuts Cycle Times.

SUITABLE FOR CUSTOMER:

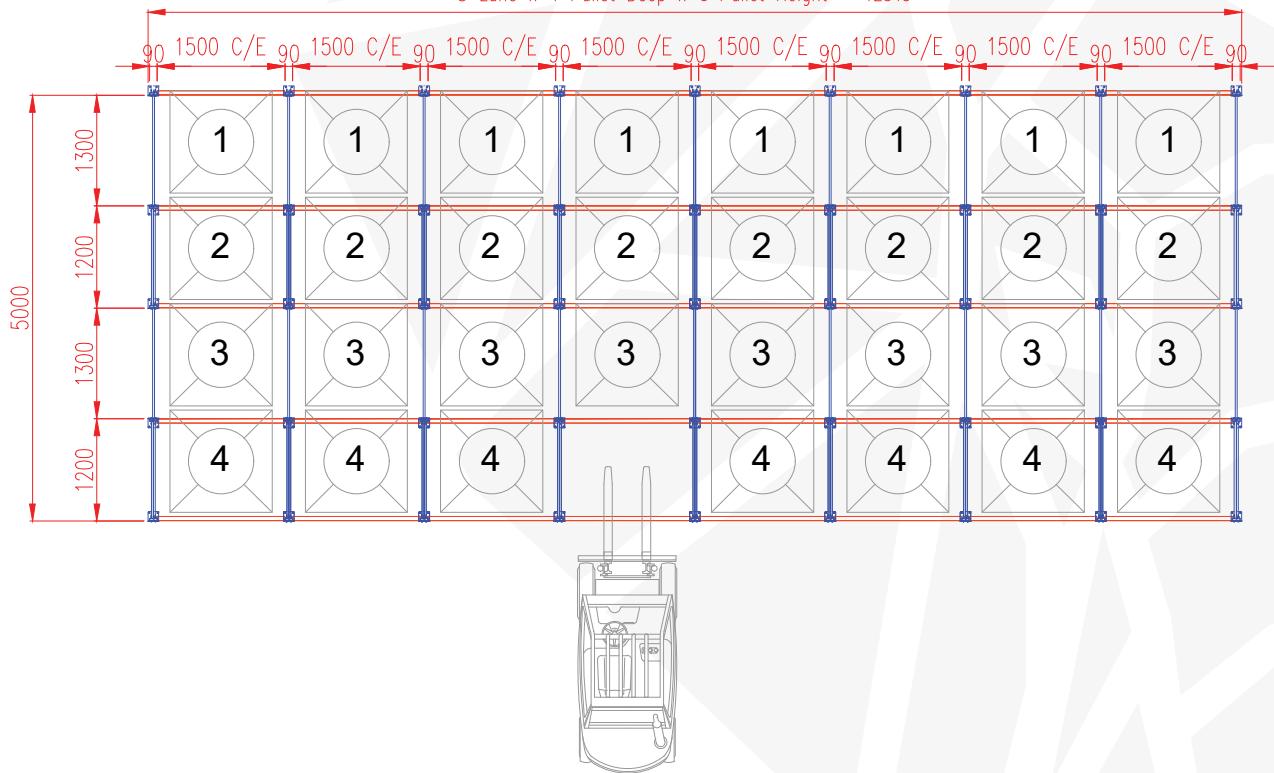

- Used For Bulk Storage / Cold Store.
- Different Size Or Types Of Palletize Stocks.
- Limited Stock Rotation.
- Limited Chambers And A Single Access Aisle.

GRAVITY FLOW RACKING SYSTEM

The **Gravity Flow Racking System**, also known as a Carton Flow System, uses gravity to move products along inclined tracks. This system is ideal for high-turnover items, ensuring first-in, first-out (FIFO) inventory management. It enhances picking efficiency by keeping products within easy reach, reducing handling times, and optimizing space utilization.

The system's design maintains a continuous flow of products towards the picking face, minimizing downtime and improving productivity. Its robust construction ensures durability and reliability, making it a valuable addition to any warehouse focused on efficient inventory management and quick order fulfillment.

ADVANTAGES:

- Up To 60% Less Floor Space Than Conventional Pallet Racking.
- First-in First-out (FIFO) Operation Provides Automatic Stock Rotation.
- Dedicated Load And Retrieval Faces Mean Only Two Fork Truck Aisles Are Required.
- Higher Speed Of Operation Within The Warehouse.

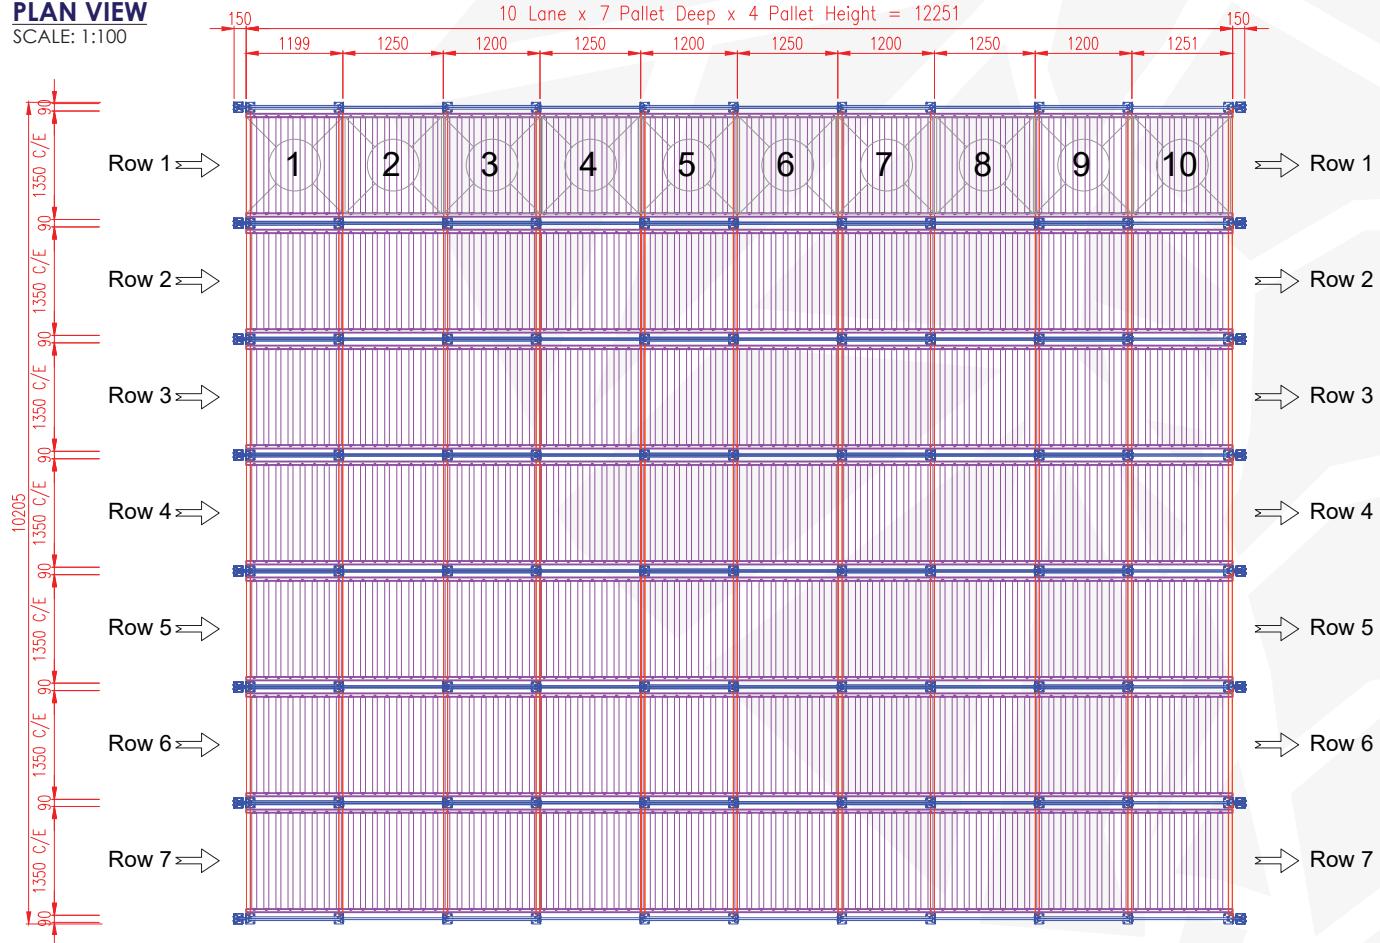

SUITABLE FOR CUSTOMER:

- Palletized Goods Need To Be Stored In Large Quantities Using The First-in, First-out Principle.
- Drinks Industry Or As A Buffer Storage Facility.
- Requires Only Two Fork Truck Aisles, One For Loading And One For Retrieval.

ASRS AUTOMATED STORAGE AND RETRIEVAL SYSTEMS

Our **Automated Storage and Retrieval System (ASRS)** revolutionizes warehousing with advanced automated technology for storing and retrieving products. This system maximizes space utilization, increases efficiency, and reduces labor costs by automating repetitive tasks. Ideal for high-density storage, ASRS supports fast, accurate, and reliable material handling. It enhances inventory control and tracking, minimizes human error, and improves overall productivity. The system is scalable and adaptable to various warehouse environments, providing a flexible solution for businesses looking to streamline their operations and enhance their storage capabilities with cutting-edge automation.

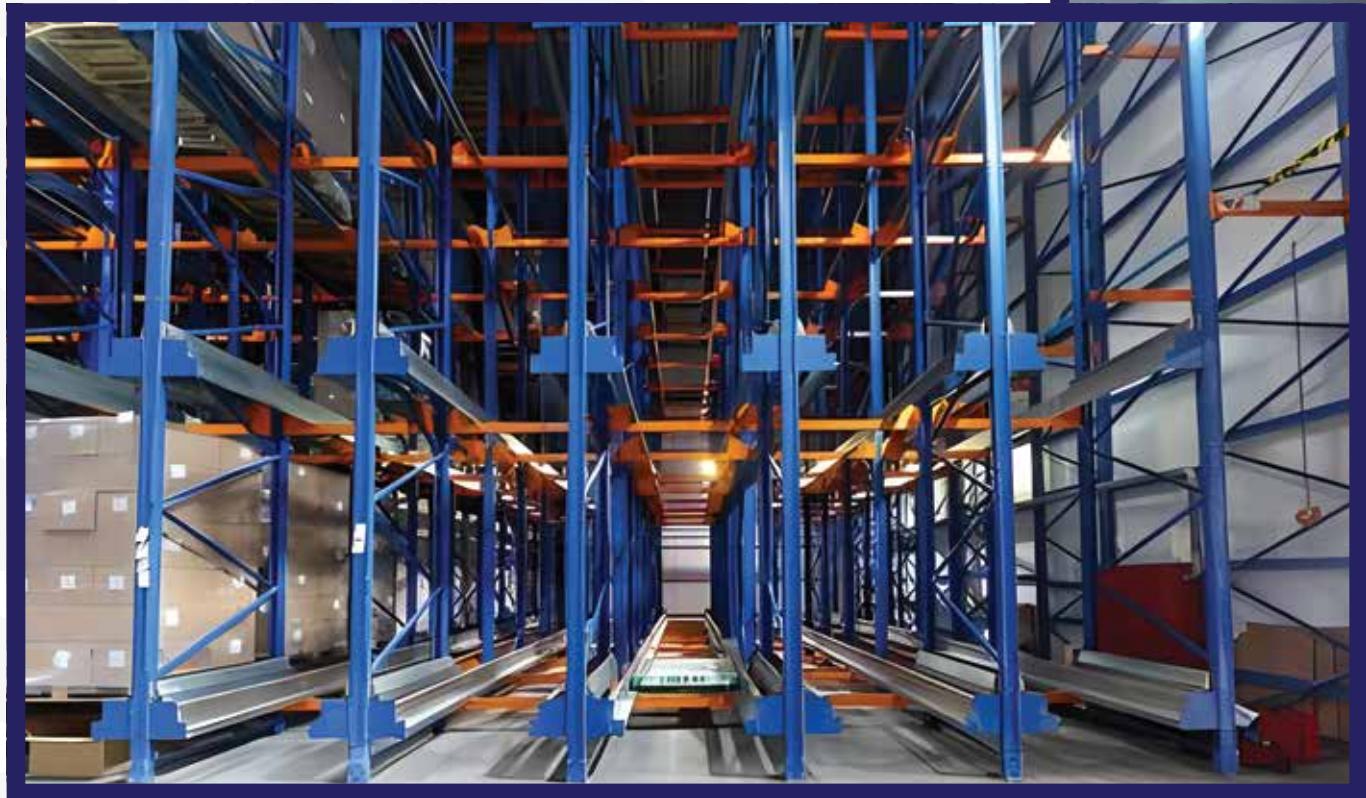

ADVANTAGE:

1. Store Up To 40 Meters High, Using More Vertical Space.
2. Handle Different Load Types And Sizes, From Pallets To Trays.
3. Integrate With Various Retrieval Technologies, Such As Cranes And Shuttles.
4. Speed Up Storage And Retrieval, Improving Productivity And Responsiveness.
5. Reduce Manual Handling And Labor Costs, Saving Money.
6. Prevent Errors And Misplacements With Automated Tracking And Retrieval.
7. Track Stock Levels And Locations In Real Time, Enhancing Inventory Management.

SUITABLE FOR CUSTOMER:

1. For Most Warehouse.
2. Handling Large Volumes Of Diverse Inventory.
3. Ensuring FIFO (First In, First Out) Inventory Rotation And Maintaining Product Freshness Is Facilitated.
4. Need For Strict Temperature And Humidity Control.
5. Rapid Order Fulfillment Demands Of E-commerce.

SHUTTLE RACKING SYSTEM

The **Shuttle Racking System** is an innovative high-density storage solution that uses a motorized shuttle to move pallets within the racking structure. This system maximizes storage capacity and improves operational efficiency by automating the movement of goods. It is ideal for warehouses with high-volume, multi-deep storage needs. The shuttle system supports both first-in, first-out (FIFO) and last-in, first-out (LIFO) inventory management, providing flexibility for various storage requirements. Its robust design ensures durability and safety, while the automated shuttle enhances productivity by reducing the need for manual handling and optimizing space utilization.

**ADVANTAGE:**

- Faster Loading & Unloading With Electric Shuttles.
- Maximize Space With Minimal Clearance Needs.
- Flexible Storage For LIFO Or FIFO Inventory.
- Simplified Operation With System Control.
- Reduced Damage With Forklifts Out Of Storage Lanes.

SUITABLE FOR CUSTOMERS:

- Warehouses With High-Volume Pallets
- High Throughput Environments.
- Cold Storage Facilities.
- Seasonal Businesses.
- Warehouses Needing Buffer Zones.
- Space-Constrained Warehouses.

TWIN-BAY RACKING SYSTEM

Our **Twin-Bay Racking System** offers an efficient and flexible storage solution, featuring two adjacent bays for enhanced storage density and accessibility. This system is designed to accommodate a variety of pallet sizes and weights, making it ideal for warehouses with diverse storage needs. The twin-bay configuration allows for efficient use of space while maintaining easy access to each pallet. Its sturdy construction ensures stability and safety, providing a reliable solution for high-volume storage environments. The system is easy to install, adjust, and expand, offering a scalable and versatile storage option to meet evolving warehouse requirements.

ADVANTAGES:

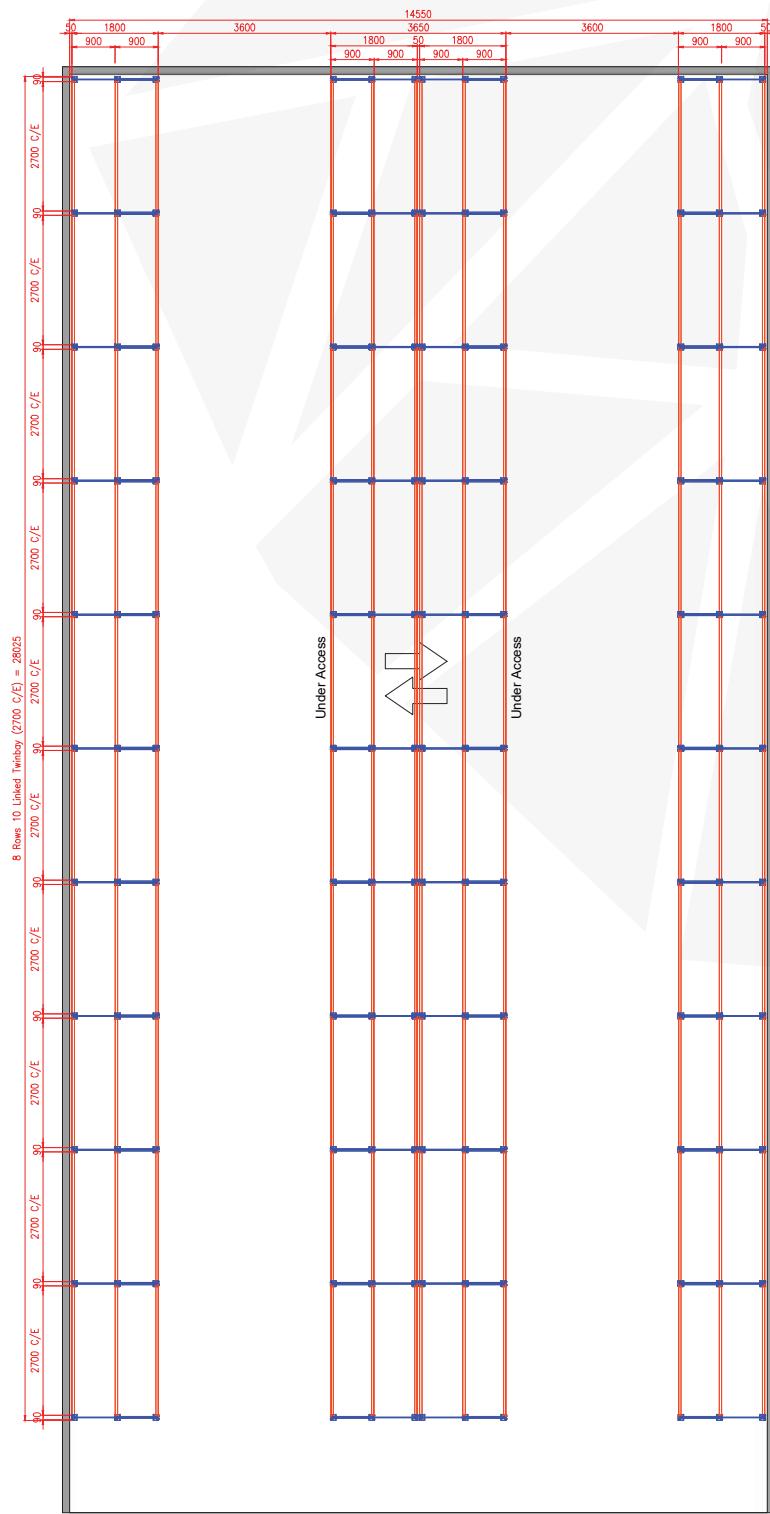

- Lowering Structure Costs.
- Low Floor Area Utilization.
- Good Stock Rotation.
- Good Order Picking; 100% Selectivity.
- Rapid Handling Of All Types Of Palletized Goods Or Un-palletized Goods.

SUITABLE FOR CUSTOMERS:

- Fast Moving Consumer Goods (FMCG).
- Inventory Is Rapidly Depleted And Restocked (Called Quick Turnover).
- Different Categories Of Goods.
- To Support Mezzanine Floor.

CANTILEVER RACKING SYSTEM

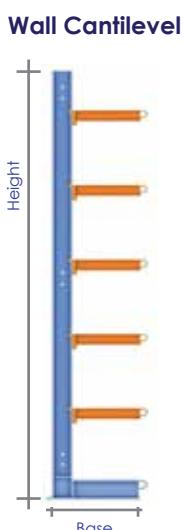

Wall Cantilever

ADVANTAGES:

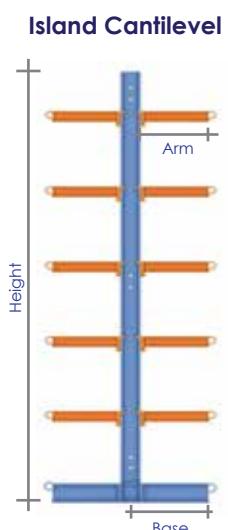

- High Density Storage- Maximizing Cubic Space.
- Locations For Oversized Products.
- Clear Layout With Easy Access, As They Do Away With The Need For Vertical Uprights At The Front Of The Racking And Use The Minimum Of Space, All At Low Cost.
- Cantilever Arms Can Be Modified Flexibly For Stored Goods With Different Heights And Loading.

SUITABLE FOR CUSTOMERS:

- For Oversized Products Which Cannot Be Safely Blocked And Stacked.
- Fast Moving Consumer Goods (FMCG).

BASED PLATE

PLATFORM

HYPERRACK SUPERBLOCK MEZZANINE FLOOR

The **Superblock Platform** is a revolutionary alternative to traditional industrial platforms, designed with an innovative interlocking system similar to racking structures. Unlike platforms built with I-beams or hollow section steel, the Superblock Platform offers easy assembly and flexibility, allowing for quick adjustments and reconfigurations.

Constructed with high-quality materials, it ensures durability and strength, capable of supporting substantial loads. Its modular design provides efficient use of space, making it ideal for various applications in warehouses and industrial settings. The Superblock Platform enhances operational efficiency and safety while offering a cost-effective and versatile solution for modern industrial environments.

PLATFORM FLOORING MATERIAL

HYPERRACK RACKING SYSTEM MEZZANINE:

- Cost Efficient Creation Of Extra Space In Existing Building.
- Largest Heavy Duty Floors.
- With A Standard Load Up To 1000kg / M2.
- Span Up To 10 Meters.

PLYWOOD

- We Use Only High Grade Of Plywood
- Cost Efficient

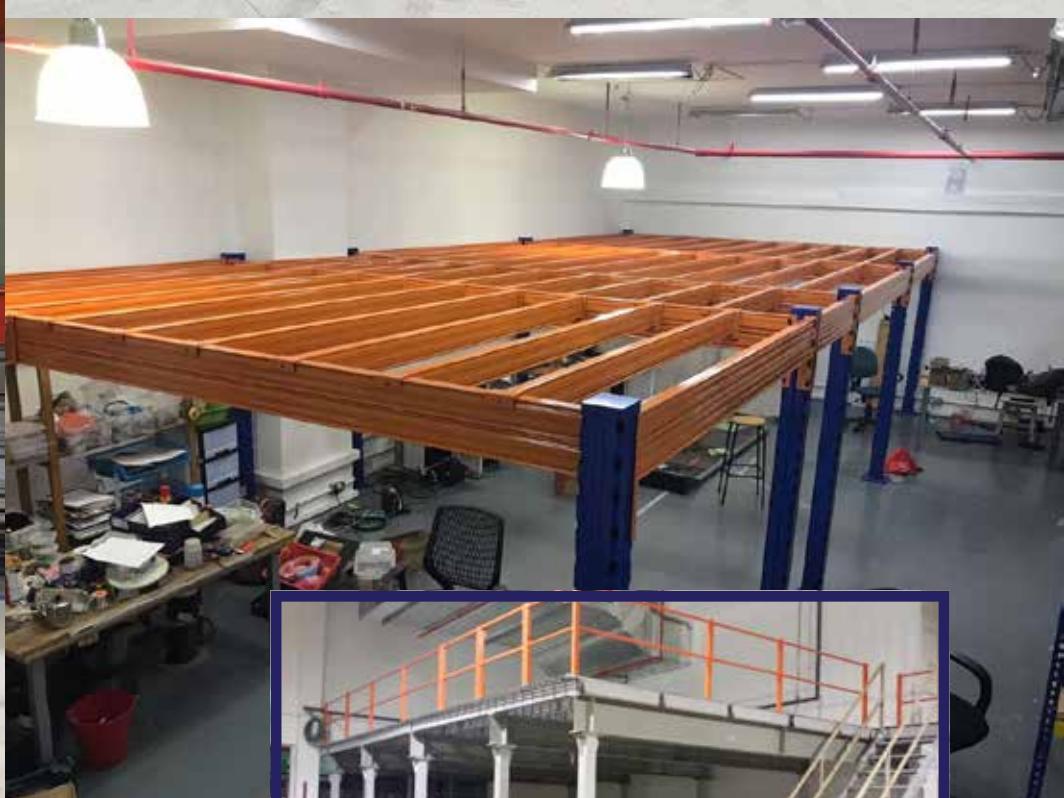

STEEL PLANK

- Provide Lit And Ventilated Environment

CHECKED PLATE

- For Heavy Duty Use

YOUR ADVANTAGES WITH HYPERACK

STEEL PLATFORM:

- A More Economical Solution Than Concrete.
- Demountable And Reusable.
- Easy To Erect In Existing Buildings.
- Light Transparent (With Steel Grid Floors).
- Planning, Consulting, Design And Assembly All From One Source.
- Simple Scalability Of The Design.
- Comprehensive Selection Of System Components And Accessories.

TRUSS SYSTEM

HEAVY DUTY RACKING SUPPORTED PLATFORM

Our **Heavy Duty Racking Supported Platform** is perfect for large-scale warehouses and industrial environments. It boasts a high load capacity, ensuring stability and safety for extremely heavy goods. Constructed from high-quality steel with reinforced joints, it offers exceptional durability. The design is customizable to fit specific warehouse layouts and is easy to assemble with minimal disruption. Safety features include barriers, guardrails, and anti-slip surfaces, making it a reliable and secure storage solution.

WHY CHOOSE HYPERACK PLATFORM?

- Planning, Consulting, Design And Assembly All From One Source.
- Simple Scalability Of The Design.
- Comprehensive Selection Of System Components And Accessories.
- Cutting Out The Middleman, We Able To Reduce Our Selling Price To You.
- We Provide 12 Months Warranty For Our Quality Platform.
- Life Time After Sales Services.

ADVANTAGES FOR RACKING SUPPORTED PLATFORM:

- A More Economical Solution Than Concrete.
- Easy To Build; Demountable And Reusable.
- Easy To Erect In Existing Buildings.
- Light Transparent (With Steel Plank Flooring).

BOLTLSS RACKING SUPPORTED PLATFORM

Our **Boltless Racking Supported Platform** is a cost-effective, adjustable storage solution ideal for light to medium-duty applications in shop and small warehouses or stores. Its boltless design ensures quick, tool-free assembly. The platform supports various goods with flexible configurations, allowing for easy reconfiguration. It's an affordable option that doesn't compromise on durability, featuring practical elements like adjustable feet and optional accessories for better organization.

MEDIUM-DUTY RACKING SUPPORTED PLATFORM

Our **Medium-Duty Racking Supported Platform** offers a versatile storage solution for medium-sized warehouses and retail spaces. It supports medium-weight goods with a sturdy construction that ensures stability. The adaptable design can fit various storage needs and space constraints. It efficiently maximizes vertical storage, enhancing organization and capacity. Installation is user-friendly, allowing for quick and straightforward setup, minimizing operational downtime.

MULTI-TIERS RACKING SUPPORTED PLATFORM

Our **Multi-Tiers Racking Supported Platform** is a cost-effective, adjustable storage solution ideal for light to medium-duty applications in shop and small warehouses or stores. Its boltless design ensures quick, tool-free assembly.

The platform supports various goods with flexible configurations, allowing for easy reconfiguration. It's an affordable option that doesn't compromise on durability, featuring practical elements like adjustable feet and optional accessories for better organization.

PALLET TAINER

Our **Pallet Tainer** is a versatile and robust storage solution designed for efficient handling and organization of goods. Made from high-quality steel, it provides excellent strength and durability, capable of supporting heavy loads.

The Pallet Tainer features a collapsible design for easy storage when not in use, maximizing your warehouse space. Its stackable structure ensures stable and secure stacking, enhancing vertical storage efficiency. Ideal for various industries, it simplifies the transportation and storage of bulk items, ensuring safety and convenience. Enhance your material handling operations with our reliable and practical Pallet Tainer, built to withstand the demands of busy warehouse environments.

 Are All Usable Dimensions.

WEIGHT CAPACITY:

Available In Three Maximum Load
 Bearing Capacities: 500kgs / 1000kgs /
 1500kgs

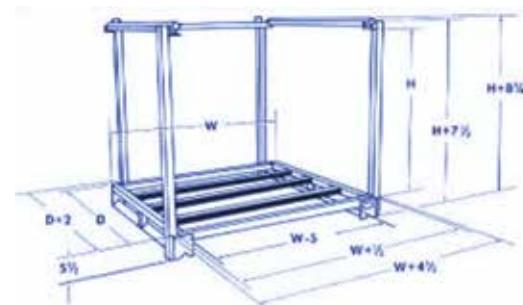

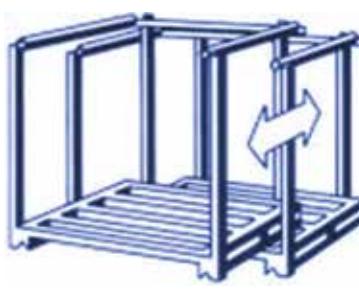

SELF-GUIDED STACKING

The Pallet Tainer exclusive inverted angles provide safe, secure and simple stacking. By positioning the bottom angles of the top rack over the stacking tubes of the unit below, the Nestainer rack can be guided into its stacked position for full column-to-column loading. Self-guided stacking does away with the trial and error method of post and target stacking.

FRONT-END NESTING

Pallet Tainer front-end nesting increases empty rack handling and efficiency. Each rack adds only 5.5 inch to the overall nested height and overhang is limited to 2 inch per rack. This results in nesting ratios as great as 12:1, depending on rack height and depth, and allows rack nesting in low overhead areas. Rack nests can be easily handled with a lift truck or motorized pallet jack.

MULTI-TOOLS BOX

Our **Multi-Tools Box** is the ideal solution for keeping your tools organized and accessible. Made from durable, high-quality materials, this box is designed to withstand heavy use in various environments. It features multiple compartments and trays for efficient sorting and storage of a wide range of tools and accessories. The stackable design allows for easy storage and organization, maximizing your workspace. With secure latches and robust construction, the Multi-Tools Box ensures your tools are well-protected and ready for any task, enhancing your productivity and efficiency in both professional and DIY settings.

M.H.E— MATERIAL HANDLING EQUIPMENT

HAND PALLET TRUCK

Our **Hand Pallet Truck** is a robust and reliable solution for efficient material handling in warehouses, factories, and retail environments. Designed to lift and transport heavy pallets with ease, it features a sturdy steel frame and durable hydraulic pump for smooth operation.

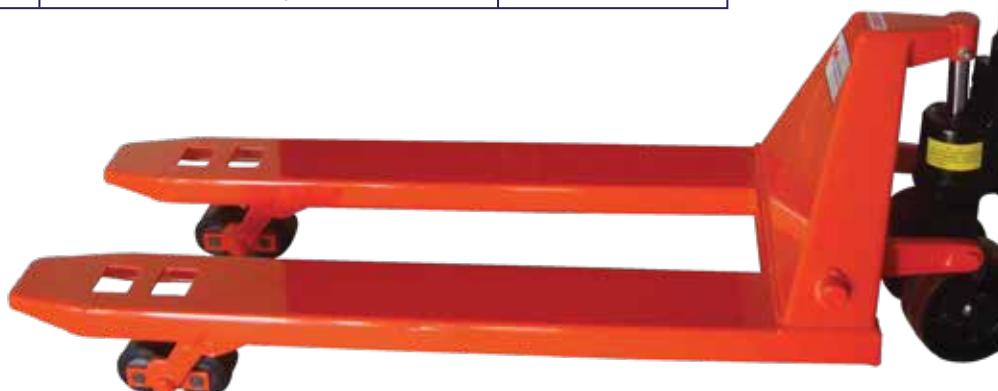

The ergonomic handle provides comfortable control, while the precision bearings ensure effortless maneuverability. With a high load capacity and reinforced forks, this pallet truck can handle demanding tasks with ease. The compact design allows for easy navigation in tight spaces, making it an essential tool for improving productivity and safety in your material handling operations.
